Introduction

Overview

Patch EAS*1*5 contains changes to the **V***IST***A** Enrollment Application System (EAS) module, which were made to meet the requirements of the Veterans Millennium Health Care and Benefits Act, Public Law 106-117, Sec. 101, that mandates the application of copayments for veterans receiving Long Term Care (LTC) services. It includes the following functionality:

1. Allows users to enter, edit, store and print financial information given by the veteran on the 10-10EC Application for Extended Care Services
2. Allows users to designate a veteran who is exempt from the LTC copayments and the reason for the exemption
3. Using the financial information entered from the 10-10EC form, automatically calculates and displays or prints an estimate of the LTC copayments that the veteran will be obligated to pay for the next twelve months
4. Provides Integrated Billing with a veteran's copayment amount via an API

Purpose

The purpose of this installation guide is to provide instructions for use by technical staff members who will be installing the Enrollment Long Term Care Copayment Software (Patch EAS*1*5)

Related Manuals

The following related manuals are also being released with the Enrollment Long Term Care Copayment Software (Patch EAS*1*5):

Manual Name	Description
Long Term Care (LTC) Copayment – Enrollment User Manual	Provides instructions for using the user menus / options exported with Patch EAS*1*5
Long Term Care (LTC) Copayment – Enrollment Technical Manual	Provides technical information for technical staff who are responsible for implementing and maintaining the Enrollment Long Term Care Copayment Software (Patch EAS*1*5).

Preinstallation Considerations

Other Software Versions Required

The following **V***IST***A** package versions or higher must be installed prior to installing the Enrollment Long Term Care Copayment Software (Patch EAS*1*5):

Package Name	**Minimum Version Required**
Income Verification Match (IVM)	2.0
Kernel	8.0
VA FileMan	22.0
V*IST***A** HL7	1.6
Patient Information Management System (PIMS)	5.3

Installation Instructions

Patch EAS*1*5 can be loaded with users on the system. Installation will take less than 10 minutes. It is recommended that the software initially be installed and tested in test accounts before installing in production accounts. In the following instructions, user responses are shown in **bold** type.

1. From the PackMan menu , select the INSTALL/CHECK MESSAGE option. (Note: TEXT PRINT/DISPLAY option in the PackMan menu will display the patch text only.)

2. From the Kernel Installation and Distribution System (KIDS) menu, select the Installation menu.

3. From the Installation menu, you may elect to use the following options:

    a) Backup a Transport Global - This option will create a backup message of any routines export with the patch. It will NOT backup any other changes such as DDs or templates.
    b) Compare Transport Global to Current System - This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).
    c) Verify Checksums in Transport Global - This option will allow you to ensure the integrity of the routines that are in the transport global.
    d) Print Transport Global - This option will allow you to view the components of the KIDS build.

4. Use the Install Package(s) option and at the "Select INSTALL NAME:" prompt, enter **EAS*1.0*5**.

5. At the "Want KIDS to Rebuild Menu Trees Upon Completion of Install? YES//" prompt, respond **NO**.

6. At the "Want KIDS to INHIBIT LOGINs during the install? YES//" prompt, respond **NO**.

7. At the "Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES//" prompt, respond **NO**.

Sample Installation
